FEEL THE
LOVE
FOR THE
ORIGINAL.

NUK *Nature Sense*

Gives breastfed babies a familiar and natural drinking sensation when drinking from a bottle.

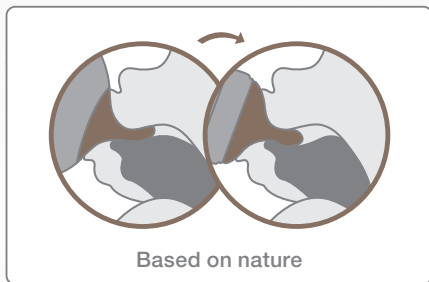

Understanding Life.

MUMMY, YOU'RE THE BEST!

You are irreplaceable for your baby.

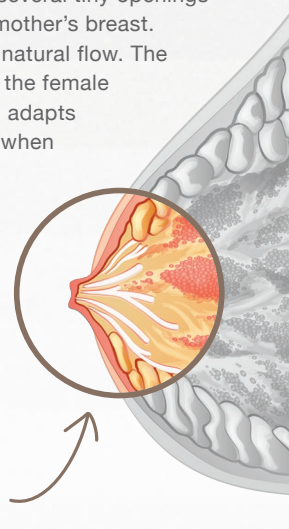

How good that the NUK Nature Sense baby bottle gives your little one the sensation of drinking at mother's breast. That's what over 90% of babies "tell us", not with words, but by accepting NUK Nature Sense without any problems* and being simply able to switch back and forth between bottle and breastfeeding. An indispensable help for mums who deserve a break, for dads who would like to feed their baby too and for when it is time to wean.

*Independent market research, Germany 2016

This uniquely natural feeling is due to the fact that the teat is modelled on a mother's nipple. Down to the last detail. The NUK Nature Sense teat has several tiny openings – modelled on the milk ducts in a mother's breast. These give an optimal, even and natural flow. The shape of the teat also resembles the female nipple when breastfeeding. For it adapts flexibly to the tongue and palate when the baby feeds. The NUK Nature Sense teat replicates this special shape. The material used is soft, giving that familiar feeling to your baby's lips.

SEVERAL TINY
MILK DUCTS

MAKES BABIES FEEL GOOD. AND MUMS TOO.

The soft and flexible silicone teat is particularly heat and age-resistant, plus it has a neutral smell and taste.

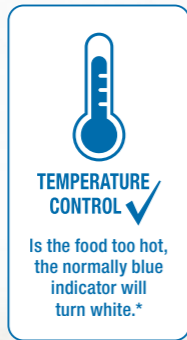

The protective cap closes all the tiny openings directly and securely.

The extra-wide neck makes filling and cleaning easy.

The bottle made of polypropylene (PP) is BPA-free and particularly hard-wearing.

* Please check temperature again before feeding.

SEVERAL TINY OPENINGS

For an optimal, smooth and natural flow.

EXTRA-SOFT TEAT TIP

The shape is flexible – like a mother's nipple.

WIDE, FLEXIBLE LIP REST

Feels like mummy's breast.

ANTI-COLIC AIR SYSTEM

Helps prevent air being swallowed – for a happy tummy.

NEEDS CHANGE. NUK TEATS CHANGE WITH THEM.

Every baby is different. Some drink a lot in a short time, others are little connoisseurs and need a bit longer. What matters most is that they drink in a calm and relaxed way. That's why the NUK Nature Sense teat is available with a different number of tiny openings: S = 3 openings, M = 6 openings, L = 9 openings. We recommend starting with size S. However, if your little one is not, or is no longer, satisfied with that, you should change to M or L.

DISCOVER OUR DOUBLE ELECTRIC BREAST PUMP.

89% of midwives
would recommend the NUK Nature
Sense double electric breast pump.*

The figure is even 95% among midwives who are familiar with other double electric breast pumps. They rated the suction efficiency as good or very good with no exceptions.
