

FREEDOM IS CALLING.

NUK Space Soothers

Allows delicate baby skin to breathe.

Understanding Life.

THAT BABY NEEDS FRESH AIR!

Air and care for the skin!

Your baby's skin is soft and sensitive. That's why we have designed our NUK Space Soother to give skin air and space to breathe. An effect confirmed by 99% of mothers.*

GENTLE TO DELICATE BABY SKIN

The unique design allows the skin to breathe a sigh of relief.

* Independent market research, 114 mothers; Germany 2018.

THE FAMILIAR FEELING

Thanks to the original NUK shape, it's almost like a mother's breast.

NO NIPPLE CONFUSION

Thank you, Mother Nature: The soother is based on the natural shape of a mother's nipple while she breastfeeds.

HEALTHY JAWS. HEALTHY TEETH.

The NUK shape of the teat leaves room for the healthy development of the tongue and jaw.

GROWS WITH YOU

Three teat sizes, because little ones grow so quickly.

The size recommendation is indicative and may vary depending on your child's individual development.

BARELY NOTICEABLE. BUT YOU STILL CAN'T MISS IT.

Thanks to its unique design, the NUK Space Soother is not only gentle against baby skin, it also looks great. And now it comes with lots of new motifs: from the squinting owl to the sweet kitten, there is something for everyone's taste. There are now also three motifs with Glow-in-the-Dark Effect, making them especially easy to find at night.

Of course, the NUK Space Soother's teat has the original NUK shape that is modelled on a mother's nipple while she breastfeeds. This means NUK soothers aid healthy oral development, are accepted by 95% of babies* and do not cause nipple confusion.*

The teat is so flat, thin and narrow that it fits perfectly into little mouths and leaves the tongue, as well as the jaws, enough room for natural sucking movements. A fact that midwives, paediatricians and orthodontists**, just like mothers*, confirm. And these movements not only ensure the intake of food: they also exercise every muscle that babies need for correctly learning to swallow, chew and speak.

MORE CHOICE

How cuuute! 6 new motifs plus 3 with Glow-in-the-Dark Effect.

100% OF ORTHODONTISTS

confirm that NUK soothers do not cause jaw misalignment or crooked teeth.*

99% OF MOTHERS

recommend NUK Space for babies with delicate skin.**

95% OF BABIES

accept NUK soothers.***

92% OF BREASTFEEDING MOTHERS

confirm that NUK soothers do not affect breastfeeding.***
